CASHNet Suite of Product

CASHNet applications are intuitive and easy to use. They provide each user with precisely the capabilities needed to meet the task at hand, making it a task- and account-balanced, making a payment, enrolling in an installment plan, receiving a refund, or making a donation to your alma mater's building fund.

CASHNet eBill

What did I owe now and how do I pay? Access your institution's bills online, eliminating the cost of postage, paper and handling. Students and parents can view both current and prior bills at their convenience and make payments (or make payment arrangements) 24 x 7.

Capabilities include:
- Single or multiple bills, W2 and pay-on-delivery notes
- Integrated controls for publishing bills and tracking customer payments
- Single sign-on compatibility with existing campus portals
- Prevent both static and dynamic bills

CASHNet ePayment

What do I owe now and how do I pay? Provide your students and parents with the ability to view statements and make online, automated payments at any time over the week or through business hours.

Capabilities include:
- Multi-ethnic vendors: Credit/Debit Cards, eChecks, CampusCards, ATM Cards
- Payment for both billed and miscellaneous charges
- Optional recurring and third-party payments
- The security of Level 1 PCI certification, with full FERPA and GLBA compliance

CASHNet eRefund

What did I receive in my institution's online storehouse? Give your departments a secure, yet easy-to-use way to create their own web storefronts without having to utilize valuable IT resources. Customizable and fully PCI certified, this is a powerful solution for creating, controlling and managing the growing number of web storefronts appearing on your campus.

Capabilities include:
- A "Storefront Wizard" and standard templates for speed and simplicity
- Customized business rules to ensure adherence with campus policies
- Product catalogs for tax control, inventory, shipping and tax handling
- Interface to ancillary systems for development, alumni, event ticketing etc.

CASHNet Cashiering

How do I turn "under-performing" payments into an "on-time" one? When your customers or departments need to receive payments, CASHNet Cashiering streamlines the transaction into a "one-stop, one-stop" solution. Participating departments have live access to your campus platform.

Capabilities include:
- Secure, web-based cashiering deployable anywhere on campus
- On-line configuration for both walk-in and online payment processing
- Web-based Departmental Deposit entry and receiving
- Online inquiry and reporting of any payment made anywhere on campus
- Check conversion and mileage functionality

CASHNet Suite of Product

CASHNet's eBill service allows students to stay connected anytime, anywhere. Taking communication to the next level, CASHNet's eBillification services customer service by providing students, parents and authorized payers with a secured, contractually configured mechanism to receive invoices and EMB notifications.

CASHNet eRefund

What did I receive in my institution's online storehouse? Give your departments a secure, yet easy-to-use way to create their own web storefronts without having to utilize valuable IT resources. Customizable and fully PCI certified, this is a powerful solution for creating, controlling and managing the growing number of web storefronts appearing on your campus.

CASHNet eMarket

How do I find "under-performing" payments just in time? When your customers or departments need to receive payments, CASHNet Cashiering streamlines the transaction into a "one-stop, one-stop" solution. Participating departments have live access to your campus platform.

Capabilities include:
- Secure, web-based cashiering deployable anywhere on campus
- On-line configuration for both walk-in and online payment processing
- Web-based Departmental Deposit entry and receiving
- Online inquiry and reporting of any payment made anywhere on campus
- Check conversion and mileage functionality

CASHNet went beyond what would be expected of any vendor to ensure our satisfaction with the CASHNet product. They know what they are talking about.
Business Benefits

While you focus on the key academic, research and community service missions of your institution, CASHNet’s "any payment, anytime, anywhere® protects the assets, privacy and reputation of your institution and its customers as they deal with the "business" of their education.

Maximizing Financial Return

CASHNet's "Software as a Service" model enables you to reliably forecast campus commerce costs while being provided access to the latest technological advancements without further need for additional software or hardware investments. Our hosted architecture provides broader reach, greater scalability, and lower cost than any alternative strategic tools, making CASHNet effective for any campus, regardless of size and mission.

State of the Art Security

Protect your students' financial information and personal privacy and your institution's assets and reputation with need-based data encryption, security certification and compliance, and access control. CASHNet's state-of-the-art data center provides the architecture and processes that secure an unprecedented level of safety and availability for every element of commerce on your campus.

Integration

CASHNet's strategic alliances and decades of interface expertise guarantee you seamless, end-to-end integration with your institutions administrative and financial systems, whether Jenzabar, Peoplesoft, Banner, Diamond or legacy. Furthermore, we utilize our growing catalogue of tactical vendor alliances for specialized systems such as housing, dining, parking, idenity events and health services to make sure that a consistent commerce solution is available at every corner of the campus.

Deployment, Training and Support

Deployment is fast and painless. Initial and recurrent training options are aligned with your institution's policies and procedures and range from web-based to on-campus classes using real-life, hands-on exercises for users and administrators. Operational support is provided by our team of technical, multi-lingual, multi-ethnic professional.
